

Disable Area Code /Call Waiting Windows Me, 2K, 98 SE

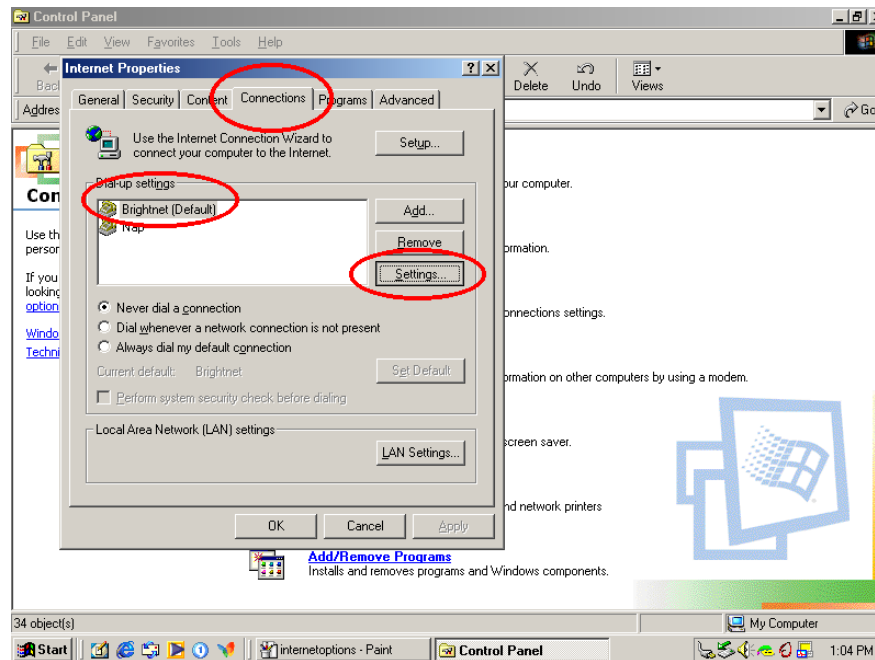

1. Click on Start, Settings, and Control Panel as shown in the picture below.

2. Inside of the control Panel click on Internet options or for Win 98 double click Internet Options.

3. Inside of the Internet Options Window click on the tab at the top labeled "Connections", after clicking the tab select your Brightnet dialer from the list in the white box and click on it once and click on settings at the right.

4. Inside of the Dialer settings window make sure you are in the tab "General", to disable call waiting put a *70 and a comma in front of your phone number so it looks like *70, 555-5555. Uncheck the box "Use area code and dialing properties". Click ok and your done!
